

**Broadland Buildings At Risk Pilot  
Volunteer Training Day**

06/04/2013

# Introduction

# Introduction

## Who we are:

- John Ette, English Heritage (EH)
- Trudi Hughes, EH
- Barbara Hornbrook, Broadland District Council (BDC) - mentor
- Lynette Fawkes, BDC - mentor
- Iain Soden, IS Heritage - mentor
- Kate Pinnock, Ingham Pinnock Associates (IPA)
- Ross Ingham, IPA

# Introduction

## Housekeeping

- Fire escapes
- WCs
- Refreshments

# Introduction

## Programme for the day

**11.15-11.45:** Introduction to the pilot

**11.45-12.30:** Introduction to undertaking building at risk surveys

**12.30-1.30:** LUNCH

**1.30-3.00:** Group training sessions

**3.00-3.15:** Wrap up

**3.15-4.00:** BREAK

**4.00-5.00:** Lecture

## Introduction

### What we would like you to take from today

- Meeting your survey mentor
- Meeting your survey partner
- A better understanding of the pilot
- A working knowledge of undertaking a building at risk survey

Background to the pilot

## Background to the pilot

### Heritage at Risk Programme

- The Grade II Listed buildings at risk pilots are part of the Heritage at Risk Programme
- The Heritage at Risk Programme (HAR) was launched in 2008 by English Heritage, as a way of understanding the overall state of England's historic sites
- The programme identifies those sites that are most at risk of being lost as a result of neglect, decay or inappropriate development

## Background to the pilot

### Grade II Listed buildings at risk pilots

- In Autumn 2012 EH announced it would like to progress a number of pilot studies looking at methods for establishing Grade II listed buildings at risk registers
- EH maintains at risk registers for Grade I and Grade II\* listed buildings (which make up only 8% of listed buildings), however, there is no standard risk register for Grade II listed buildings
- English Heritage has chosen 19 pilots covering a range of areas, locations and types of survey method
- The pilots commenced in February 2013 and will be completed by August 2013.

## Background to the pilot

### **Broadland buildings at risk pilot**

- Broadland District Council and Ingham Pinnock Associates were selected in January 2013 to undertake one of the 19 pilots
- The pilot covers the Broadland District Council area
- Although the pilots are concentrating on Grade II Listed buildings, the Broadland pilot will also include Grade I and II\* Listed buildings
- If the pilot is successful it could provide a template for a national roll out.

The Broadland Pilot

## The Broadland pilot

### **Overarching approach of the Broadland pilot:**

- To combine voluntary support with local authority knowledge and professional expertise

## The Broadland pilot

### **Broadland pilot objectives:**

- To establish a register of Grade II Listed buildings at risk in Broadland
- To review the existing Grade I and II\* Listed buildings at risk register for Broadland
- To trial the use of volunteers in surveying buildings at risk
- To use Town and Parish Councils' local knowledge
- To provide help and support for buildings that are identified as being at risk.

**It is important to remember this is a pilot! It is as much about what works as it is about what doesn't work. We are all learning together!**

The team structure

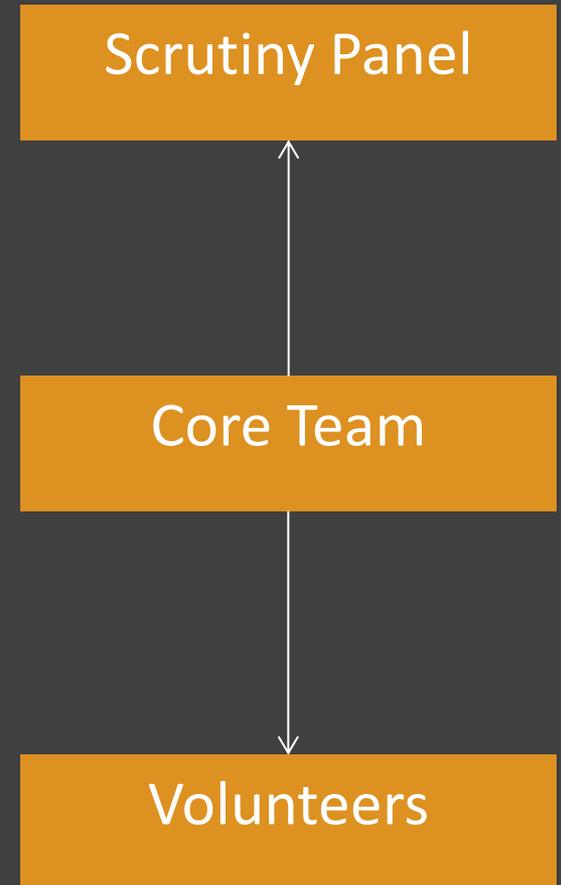

## The team structure

**Scrutiny Panel:** Includes the Core Team, Norfolk County Council, English Heritage, BDC Economic Development and Planning teams and funding/heritage experts.

**Core Team:** Barbara Hornbrook (BDC conservation), Lynette Fawkes (BDC conservation), Kate Pinnock (IPA) and Ross Ingham (IPA)

**Volunteers:** General public, history groups and Town and Parish Councils

The Process

## The process

### Overarching process for Broadland pilot

- **Step 1:** Establish pool of volunteers
- **Step 2:** Establish a list of buildings to survey
- **Step 3:** Carry out surveys
- **Step 4:** Review buildings identified as potentially being at risk
- **Step 5:** Compile the buildings at risk register
- **Step 6:** Establish next steps for buildings at risk

## The process

### Process for volunteers

- A) Attend training day
- B) Receive buildings for survey
- C) Select survey days
- D) Undertake survey (part 1)
- E) Submit survey to mentor
- F) Meet with mentor to review survey forms and establish whether a part 2 survey is required
- G) Attend final lecture

The rest of the day

## The rest of the day

### Programme for the day

**11.15-11.45:** Introduction to the pilot

**11.45-12.30:** Introduction to undertaking building at risk surveys

**12.30-1.30:** LUNCH

**1.30-3.00:** Group training sessions

**3.00-3.15:** Wrap up

**3.15-4.00:** BREAK

**4.00-5.00:** Lecture

## The rest of the day

### **Purpose of introduction to undertaking buildings at risk surveys presentation (11.45-12.30pm)**

- To illustrate what a building at risk is
- To highlight how to identify a building at risk
- To give an introduction to the survey form

## The rest of the day

### **Purpose of group training sessions (1.30-3.00pm)**

- Meet mentor
- Review information packs
- Equipment requirements
- Guidance on undertaking surveys
- Establish survey partner
- An opportunity for you to ask questions.

## The rest of the day

### **You should all have:**

- Been allocated a training group (A,B, C or D) and mentor
- Given an information pack
- Given a high visibility jacket

If you have not been given any of these things, please see Kate during lunch.
